RE: Jennesstown Manor Site Plan Application
Tax Map 7, Lots 39 & 39-1 – Warner

Dear Ms. Almanzar:

Our office is in receipt of the Aries Engineering review comments dated Oct. 20, 2025, and the Fire Department comments dated July 6, 2025. Based on the comments, we have made the required modifications and attached revised plans for review. A response to each comment has been provided below.

Aries Engineering Review Comments, dated October 20, 2025

Soils

1. Aries' review of the U.S. Department of Agriculture (USDA) Web Soil Survey indicated site soils are generally moderately to excessively well-drained soil, with the exception of an approximate 8,200-square-foot (sf) area of poorly drained soils along the southwestern property boundary of Lot 39-1. It is unclear if this area was excluded from the "buildable area" calculation for Lot 39-1, but due to the limited area, this area of poorly-drained soils should not reduce the number of permitted dwelling units on the lot. The Web Soil Survey report is attached.

   The project wetland consultant has flagged all wetlands on the property, and the project surveyor has located all the flags and depicted the location on the plan. All poorly drained soils have been accounted for in the lot sizing calculations.

Site Access

2. Site access is proposed via a 20-foot-wide single access road to the proposed site facilities with steep grades of up ~ 15%. Section III (E.) of the Town Site Plan Review Regulations require, "...suitably located streets of sufficient width to accommodate existing and prospective traffic and to afford adequate light, air, and access for firefighting apparatus and equipment to buildings". Further, Section XXIII (A.)(6) state that, "...adequate provisions must be made for fire safety, prevention, and control". Aries recommends that the proposed site access be reviewed and approved by both the Town fire and police department to ensure that site access for life-safety responses can be met by the Town.

   The common driveway has been reviewed by the Fire Department, and their comments are outlined below. No comments have been received from the Police Department.

3. Available Town Driveway Regulations allow for driveway grades of up to 15%. However,

consideration should be given to the fact that the proposed driveway provides access to eight dwelling units that will require a greater level of life-safety support than a single-family residence.

The design has been reviewed by the Fire Department and the 15% grade will be maintained in accordance with the Town of Warner Driveway Regulations.

4. Site plans show a 20-foot-wide access road with 2-foot-wide shoulders. Aries recommends that the proposed access road meet the Town road construction standards provided in the Town Subdivision Regulations, Appendix B1, including 24-foot-wide paved roadway, with 3-foot minimum width shoulders.

The Town of Warner Subdivision Regulations define street as "means, relates to and includes any street, right-of-way, avenue, road, boulevard, lane, alley, viaduct, highway, freeway, and other public ways. Street shall include the entire right-of-way." The proposed driveway is intended on being a common driveway and not a publicly owned and maintained right-of-way.

The Town of Warner Site Plan Regulations define a common driveway as "Joint / Shared Access: a driveway connecting two or more contiguous sites to the public street system."

The Town of Warner Driveway Regulations require "Driveways shall be a minimum of fifteen (15) feet wide"

National Fire Protection Association access requirements states that an unobstructed width of at least 20 feet and a vertical clearance of at least 13 feet 6 inches be provided. A 16 foot wide paved section flanked on both sides with a 2 foot gravel should fulfills this requirement. Due to the grade we, as the Engineer of Record, have proposed a 20 foot wide pave section with 2 foot gravel shoulders, to maintain pavement under emergency vehicle tires.

Based on compliance with the above mentioned requirements no modifications have been made to the design.

5. The site plans depict a fire truck turnaround and enclosed dumpster located approximately halfway down the proposed steep access road. Based on this location, it is presumed that fire trucks would need to back halfway down the steep access road to turn around. Aries recommends relocating the turnaround and dumpster area adjacent to and at the same level of the dwelling units where both fire apparatus will need to reverse direction and where refuse will be generated. This would provide a second fire truck turnaround.

The Site Plan currently places a fire truck turn-around between the two buildings, as seen on Sheet 3. The location mentioned in this comment is a second location. This location is also shared with the common dumpster location. The Owner/Developer desires to maintain the dumpster in the current location

6. The site plans indicated an approximate access road starting elevation of 433 feet and a high point elevation of approximately 478 feet for the site access road, which is approximately 420 feet in length. The average grade is approximately 10.7%, while the majority of the access road is at a grade of 14.26%. Aries recommends that the proposed site access road be lengthened to meet the Section VII Design Standards grade of 10% for a local street for all portions of the access

road.

We understand the concept of obtaining lower slope based on averaging the number but offer the following. The driveway is located on a state road under the jurisdiction of NHDOT. The edge of road is a fixed elevation. The NHDOT Driveway Policy requires the driveway to slope away from the road for drainage purposes. We also need to maintain a "flat" area for the vehicle to stop and assess approaching vehicles prior to entering the roadway. Due to the slope of the existing property the abrupt change in angle from a negative grade to a positive grade needs to be assessed. This angle needs to be analyzed for a proper vertical curve to transition for drivers comfort and physical limitation of vehicles with long bumper overhangs like fire trucks.

As can be seen on Sheet 11, the centerline profile of the driveway transitions from a -2% grade, to a +8% grade to a +15% grade. Between each change in slope a transition vertical curve has been added. This permits the appropriate platform adjacent to the roadway. To reduce the grade from 15% to the suggested 10.7% grade the point of vertical curve at the top of the "hill" would result in an additional 12 foot cut into the slope. This would also cause the structures to be about 10 lower. We have chosen to hold the 15% grade outlined in the driveway regulations to minimize the cuts and constructability of the project. No modification has been made.

Water System

7. Section XXIII (A.) of the Town Site Plan Review Regulations require, "...the applicant to provide adequate information to prove that the area of the lot is adequate to permit the installation and operation of water and sewage systems...in areas not currently served by public water and sewer".

   This office and the owner are aware of the requirement for a Construction Approval from the NHDES Subsurface System Bureau. Upon conditional approval the Owner will complete the required design and application to obtain approval.

8. The site plans depict four bedrooms per dwelling unit, which results in a total of 32 bedrooms at the proposed development. Although the two four-unit buildings are situated on separate parcels, the buildings share a common access road and other facilities and should be considered one project. NHDES community water system rules, part Env-Dw 405.02, apply to water systems that supply water to 25 or more people, at least 60 days each year. According to Douglas Sayer, NHDES Drinking-Water-and-Groundwater Bureau Design Specialist, the proposed 8-unit development does not qualify as a community water system.

   We concur with this assessment, the project does not qualify as a community water system.

9. The well radius proposed for the two wells (one on each lot) is 125', as depicted on the site plans. Using NHDES Water Supply Rules as best management guidance, including Env-Dw 405.10 - Design Flow regulations, a four-bedroom design requires 150 gallons per day (gpd) per bedroom for residential uses. As such, the design flow for each 4-unit building is:
   150 gpd/ Bedroom = 600 gpd * 4 units = 2,400 gpd

   Part Env-Dw 405 are the Design Standards for Small Community Water Systems. As determined in the prior comment Env-Dw 100 – 1507 do not apply to this project, as it is not a community water system.

The governing Code of Administration Rules is found in Env-Wq 1008.06 Protective Well Radii – Distances.
Each building will be served by it's own well. We agree with the flow calculation of 2,400 gpd per building. Table 1008-4 outlines a well radius of 125' for flows between 1,441 gpd and 4,320 gpd. Therefore, the project complies with the regulations as proposed, no modification has been made.

10. NHDES community water system rules (Env-Dw 405.12) require a source capacity that is two time the required design flow, which is 4,800 gpd, or approximately 3.3 gallons per minute (gpm) on average for each building's water supply system. This accounts for domestic water use but does not account for fire suppression or irrigation. Aries considers this to be a recommended best management practice. Based on a required minimum source capacity of 4,800 gpd per building, a Sanitary Protective Radius of 150' will be required. The current site plans depict 125' well radius.

As outlined above the referenced rules do not apply to this project. The 125' well radius has been maintained.

11. Based on this guidance, the minimum sustainable well yield needs to be greater than 3.3 gpm for each building.

Well yield is addressed by the Licensed Well Contractor at the time of occupancy permit.

12. Because an adequate water supply is a requirement for Site Plan approval, Aries recommends that certification of sustainable well yield for the proposed development be provided to the Town as a pre-condition of approval of the site plan.

This request is not outlined as a requirement in the Site Plan Regulations. As with any residential well there is a certain level of risk with well production. It is the responsibility of the Developer to ensure that well depth or diameter is increased, or storage capacity is provided, if needed, to meet the minimum requirements to obtain an occupancy permit. Simply, no water, no occupancy permit.

Alteration of Terrain Permit Application #250327-055

13. The site plans depict a cut of approximately 20 feet in Pocket Pond #41, where a proposed base elevation of 434 feet is located in the vicinity an existing ground surface elevation of 454.

No response required.

14. Test Pit #9 is shown to be located within the proposed pocket pond. The excavation log for Test Pit #9 indicated the ground surface at the test pit was approximately 450 feet, and that the test pit was extended to a depth of approximately 20 feet below ground surface (bgs), or to an elevation of approximately 430 feet. Estimated Seasonal High-Water Table (ESHWT) was present at approximately 15 inches (1.25 feet) bgs, at an estimated elevation of approximately 448.75 feet, with observed water at a depth of 60 inches (5 feet) bgs, or at an elevation of approximately 445 feet. Based on these observations, the pocket pond will constantly discharge groundwater out of the Outlet Control Structure (OCS) #41, which has a proposed outlet invert elevation of 440.1 feet.

No response required.

15. Based on this configuration, the proposed stormwater management system will unnecessarily cause groundwater levels in this area to decline due to the anticipated constant discharge from OCS #41.

We agree that this will cause a decline in the groundwater level, but disagree with the statement "unnecessarily". Altering the groundwater level in construction projects is a common occupancy. This is like the function of a foundation drain, underdrains installed along roadways, and drainage installed behind retaining walls. In accordance with the NHDES Alteration of Terrain requirements wet ponds and pocket ponds are required to have a large enough area to maintain a permanent pool of water or prove the pool will be maintained by groundwater. The biggest concern with groundwater movement into the pond will be slope stability and "sluffing" of the sidewall. As with any construction project, groundwater management needs to be addressed and controlled. If the contractor determines that the groundwater needs to be reduce in the work zone or on the pond slopes our recommendation would be for the installation of a french drain system surrounding the upslope side of the pond.

16. The presence of standing water within Pocket Pond #41 will reduce the intended storage capacity, which is not likely accounted for in the stormwater model flows.

Env-Wq 1508.03 Stormwater Treatment Practices: Stormwater Ponds. Stormwater ponds, including but not limited to micropool extended detention ponds, wet ponds, wet extended detention ponds, multiple pond systems, and pocket ponds, shall comply with the following:
(b) Stormwater ponds shall have a permanent pool, or combination of permanent pool and extended detention, greater than or equal to the WQV;
(g) The permanent pool depth shall be:
(1) Not less than 3 feet; and
(2) Demonstrated by providing:
a. A stormwater pond having a pond floor at least 5 feet below the SHWT or the lowest elevation pond outlet, whichever is lower; or
b. A hydrologic budget that accounts for the inflow to, outflow from, and storage in the stormwater pond, showing that sufficient water is available to maintain the water depth in the permanent pool;
(h) The permanent pool depth shall not be greater than 8 feet;

Based on the administrative rules a pocket pond is required to maintain the standing water.

Below is a snapshot of Node 41P of the HydroCAD analysis. Storage capacity is adjusted by the use of a starting elevation. In the case of this pond the starting elevation is set at 440.10 to match the elevation of the lowest outlet (device 2). The total cumulative storage of the pond is 10,747 cf, but the flood elevation lists 5,215 cf above start.

The calculations properly address the storage capacity.

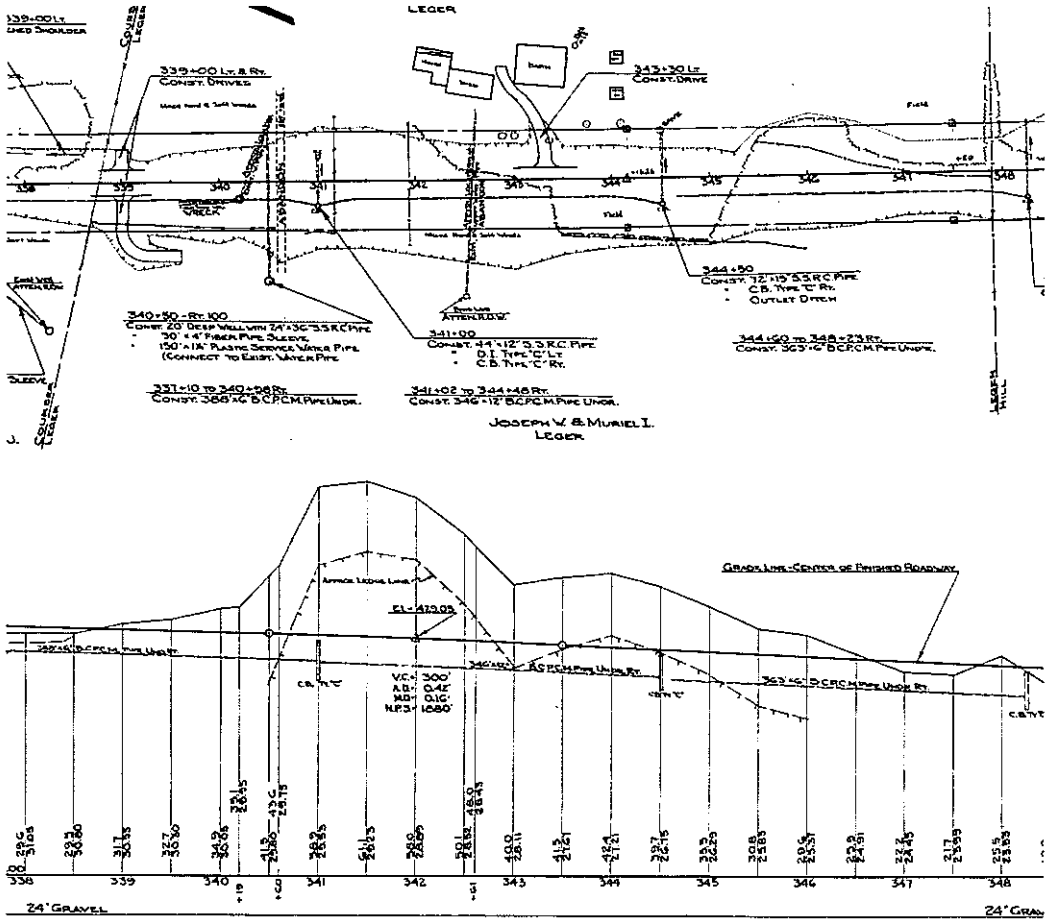
17. Lastly, the groundwater discharge from OCS#41 will increase the volume of water discharge to the State Right-of-Way (ROW), where it will flow to catch basing CB#4 and be directed beneath Route 103 through an existing 15-inch reinforce concrete pipe (RCP) culvert. This additional contribution of groundwater is not accounted for in the KNA drainage model and report. However, this additional discharge should not affect the northwesterly abutting property.

Groundwater discharge is a valid point. Groundwater will be dependent on subsurface water levels and seasonal conditions. Groundwater flow is factor separate from the storm event evaluated by the analysis. Groundwater is potentially flowing while it is not raining.

Based on an educated assumption about our design and the construction of Route 103, it can be suggested that the current subsurface groundwater flows toward Route 103. In 1953 Route 103 was constructed with underdrains on the south side of the highway that outlet into the subject catch basin, as shown in the NHDOT design plan below. Some of the groundwater flow will be intercepted by the underdrains, directed to the catch basin, and then outlet to the

surface through the 15" RCP. Based on the current design groundwater intercepted by the pond will flow to the same catch basin. We suggest that this should reduce the subface flow intercepted by the underdrain system.

What we know is groundwater outlets the pipe in the predevelopment conditions and will outlet in the post development condition. Again, groundwater flow is factor separate from the storm event evaluated by the analysis. But, based on the explanation above we know the Administrative Rules require the introduction of groundwater into the stormwater pond for proper function.



18. Aries recommends that the stormwater storage in Pocket Pond #41 be evaluated and redesigned to provide adequate stormwater storage and to mitigate groundwater discharge.

As previously outlined above, the design complies with the design requirements of NHDES Env-Wq 1500. Further the design has been reviewed by NHDES Alteration of Terrain and did not receive comments to revise the design. No modifications have been made.

Parking

19. Section IX - Site Plan Application Requirements require provision of off-street parking and loading spaces with a layout of the parking indicated snow storage locations. The site plans

appear to provide adequate parking and snow storage.

No response required.

20. Section XVII - Landscaping Standards require a minimum of one 2-1/2" caliper deciduous tree for every 20 parking spaces and every 60 feet of access roads. Available Landscape Plan details list only three deciduous trees to be planted, which does not meet the Town's Landscaping Standards.

The landscape calculations for the deciduous trees have been added to Sheet 7. Twelve additional trees have been added to the plan.

21. Handicapped parking is required under the Town Site Plan Regulations and shall conform to the most current State and Federal law in place at the time of the application. Adequate provisions shall be made for handicapped parking and safe accessibility for the handicapped from the parking spaces to the proposed building(s)/use(s). Handicap parking areas should be shown on the Site Plan and should follow the 2010 Americans with Disabilities Act of 1990 (ADA) Standards for Accessible Design.

Each unit provides 3 exterior parking spaces and 1 garage space. A total of 32 spaces have been provided. 2% of the parking spaces are required to be ADA accessible, which rounds up to one space. The ADA space can be one of the garage spaces. Should a owner request additional accommodations the developer will address on a case by case basis.

Refuse

22. Section IX - Site Plan Application Requirements require exterior solid waste disposal or recycling facilities be screened on each side. The site plans provide adequate details for the proposed solid waste disposal infrastructure.

No response required.

Minimum Buildable Area

23. The 8 residential units are located within the Medium Density Residential (R2) Zoning District, which requires a buildable area of 2 acres per dwelling unit.

No response required.

24. Note 2 of the Existing Conditions Plan indicates that Lot 39 has a buildable area of 8.774 acres, while Lot 39-1 has a buildable area of 11.05 acres. Both Lots meet the minimum buildable area.

No response required.

Drainage

25. The site plans depict four proposed stormwater discharge structures that direct stormwater to level spreaders, all of which terminate on steeply sloping land. Aries anticipates that these level spreaders will not adequately distribute the runoff and that rills and channelization will develop over time causing erosion. Aries recommends that riprap armoring be installed downslope of the outlets to a point where slopes moderate. Check dams should be installed along the anticipate flow path.

The four level spreaders as shown were added to the plan per request of the NH AoT review agent.

26. A level spreader is depicted on Lot 39 at an approximate elevation of 498 feet located along the northerly property line. The site plans depict a drainage swale at an approximate elevation starting at 506 feet that captures surface water from the upper portion of Lot 39 and directs this stormwater to the aforementioned level spreader that is located near the northerly boundary of Lot 39. As previously noted, Aries anticipates that the level spreader will not adequately distribute the runoff and that rills and channelization will develop over time causing erosion. Further, this drainage swale concentrates stormwater flows from the upland areas of Lot 39 and directs it without adequate treatment toward the northerly abutting property. It is anticipated that stormwater flows from the swale will cause increased stormwater runoff onto the northerly abutting property. Aries recommends drainage from this outfall be directed to a stormwater infiltration practice located at distance from the northerly site property boundary to limit concentrated stormwater flows toward the northerly abutting property.

The intent of the swale flowing to the level spreader is to divert "clean" runoff around the area of development. By utilizing this recommended diversion practice, runoff that passes through the construction zone will be limited and the transport of sediment will be minimized. The level spreader meets the design requirements and the drainage analysis documents that the peak rate of runoff in subcatchment 40S will be equal to or less than the predevelopment conditions. The design meets the requirements.

Erosion and Sediment Control

27. Erosion Control notes are provided in the site plan construction details. Aries recommends that the Town conduct periodic inspections to ensure that specified erosion control procedures are followed.

Note 10 on Sheet 6 provides the Town oversight on the placement and function of the erosion control.

Jennesstown Manor, Map 7 Lots 39 & 39-1- FD Comments, email dated July 6, 2025

1. The State Fire Code (NFPA 1, 2021 edition, Chapter 18) requires fire department access. Please clarify the following:
    a. Show turning template for FD access on site plan. We use the 40' bus template.

A Fire Access Plan has been attached to show the turning template.

    b. Confirm the dead-end distance from the FD turnaround between the buildings. NFPA 1 18.2.3.5.4 requires a turnaround for dead-ends over 150'.

A permanent paved turnaround has been provided between the two buildings.

    c. Confirm the approach angle coming off Route 103. See attached fire engine details. (NFPA 1 18.2.3.5.6.2 The angle of approach and departure for any means of fire apparatus access road shall not exceed 1 ft drop in 20 ft or the design limitations of the fire apparatus of the fire department).

The vertical approach angle is demonstrated in the profile view on the Fire Access Plan.

2. Buildings will require automatic sprinkler protection in accordance with the State Building Code and State Fire Code. Submit plans for review prior to construction.

Note 21 has been added to Sheet 3.

I trust the content of this response letter and its attachments will address each of the comments, as noted. Should you have further questions or require additional information, please do not hesitate to contact our office.

Respectfully,

Jason Lopez
Senior Project Manager

CONSTRUCTION NOTES:

1. THE PURPOSE OF THIS PLAN IS TO SHOW THE PROPOSED GRADING, DRAINAGE AND UTILITY SYSTEMS FOR THIS SITE.
2. ALL WORK SHALL CONFORM TO THE APPLICABLE REGULATIONS AND STANDARDS OF THE TOWN OF WARNER, AND SHALL BE BUILT IN A WORKMANLIKE MANNER IN ACCORDANCE WITH THE PLANS AND SPECIFICATIONS. THE STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, STATE OF NEW HAMPSHIRE, DEPARTMENT OF TRANSPORTATION, APPROVED AND ADOPTED 2016 ARE HEREBY INCORPORATED BY REFERENCE.
3. ALL STUMPS, ROOTS, BRANCHES, BRUSH, WOODS AND OTHER PERISHABLE MATERIAL RESULTING FROM THE CLEARING AND GRUBBING OPERATIONS SHALL BE DISPOSED OF BY AN APPROVED METHOD.
4. DEBRIS REMOVED FROM THE SITE SHALL BE DISPOSED OF IN ACCORDANCE WITH ALL LOCAL, STATE AND FEDERAL REGULATIONS.
5. PARKING LOT CONSTRUCTION SHALL CONFORM TO THE TYPICAL SECTIONS AND DETAILS SHOWN ON THE PLANS, AND SHALL MEET THE REQUIREMENTS.
6. ALL DISTURBED AREAS SHALL BE LOAMED AND SEEDED.
7. SEE DETAILS FOR DRAINAGE SPECIFICATIONS.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING AND DETERMINING THE LOCATION, SIZE AND ELEVATION OF ALL EXISTING UTILITIES, SHOWN OR NOT SHOWN ON THESE PLANS, PRIOR TO THE START OF ANY CONSTRUCTION THE ENGINEER SHALL BE NOTIFIED IN WRITING OF ANY UTILITIES FOUND INTERFERING WITH THE PROPOSED CONSTRUCTION, AND APPROPRIATE REMEDIAL ACTION TAKEN BEFORE PROCEEDING WITH THE WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONTACTING "DIG SAFE" AT 811 AT LEAST 72 HOURS BEFORE DIGGING.
9. NO TEST BORINGS WERE COMPLETED OR PROVIDED.

UTILITY NOTE

THE UNDERGROUND UTILITIES DEPICTED HEREON HAVE BEEN DRAWN FROM FIELD SURVEY INFORMATION AND OR PLOTTED FROM EXISTING DRAWINGS. KEACH–NORDSTROM ASSOCIATES, INC. MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES DEPICTED COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. FURTHER, KEACH–NORDSTROM ASSOCIATES, INC. DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM THE INFORMATION AVAILABLE. KEACH–NORDSTROM ASSOCIATES, INC. HAS NOT PHYSICALLY LOCATED THE UNDERGROUND PORTIONS OF THE UTILITIES.

NPDES NOTE

THIS PROJECT DISTURBS IN EXCESS OF 1–ACRE OF LAND. THEREFORE IT WILL BE REQUIRED TO OBTAIN NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT COVERAGE AS ISSUED BY THE ENVIRONMENTAL PROTECTION AGENCY (EPA). THE OWNER/DEVELOPER AND "OPERATOR" (GENERAL CONTRACTOR) SHALL EACH BE REQUIRED TO PREPARE AND SUBMIT A NOTICE OF INTENT (NOI) TO THE EPA PRIOR TO THE START OF CONSTRUCTION AND SHALL BE RESPONSIBLE FOR THE PREPARATION AND IMPLEMENTATION OF A STORM WATER POLLUTION PREVENTION PLAN (SWPPP) MEETING THE REQUIREMENTS OF THE CURRENT CONSTRUCTION GENERAL PERMIT.

414	MOOSILAUKE POORLY DRAINED	521	C
399	LEDGE OUTCROP	228	D

THIS MAP PRODUCT IS WITHIN THE TECHNICAL STANDARDS OF THE NATIONAL COOPERATIVE SOIL SURVEY. IT IS A SPECIAL PURPOSE PRODUCT, INTENDED FOR INFILTRATION REQUIREMENTS BY THE NH DES ALTERATION OF TERRAIN BUREAU. IT WAS PRODUCED BY A PROFESSIONAL SOIL SCIENTIST, AND IS NOT A PRODUCT OF THE USDA NATURAL RESOURCES CONSERVATION SERVICE. THERE IS A REPORT THAT ACCOMPANIES THIS MAP.

THE SITE SPECIFIC SOIL SURVEY (SSSS) WAS PRODUCED NOVEMBER 23, 2024 AND WAS PREPARED BY LUKE HURLEY, CSS # 095, HURLEY ENVIRONMENTAL AND LAND PLANNING, LLC.

SOILS WERE IDENTIFIED WITH THE NEW HAMPSHIRE STATE–WIDE NUMERICAL SOILS LEGEND, USDA NRCS, DURHAM, NH. ISSUE # 10, JANUARY 2011. THE NUMERIC LEGEND WAS AMENDED TO IDENTIFY THE CORRECT SOIL COMPONENTS OF THE COMPLEX.

HYDROLOGIC SOIL GROUP FROM KSAT VALUES FOR NEW HAMPSHIRE SOILS, SOCIETY OF SOIL SCIENTISTS OF NEW ENGLAND, SPECIAL PUBLICATION NO. 5, SEPTEMBER, 2009.

NOTES:

1. THE PURPOSE OF THIS PLAN IS TO SHOW THE EXISTING CONDITIONS OF MAP 7 LOTS 39 AND 39–1.
2. MAP AND LOT NUMBERS INDICATE THE TOWN OF WARNER ASSESSOR'S MAP AND LOT NUMBERS.
3. PARCEL INFORMATION

PARCEL INFORMATION	SQUARE FEET	ACRES	FRONTAGE	BUILDABLE AREA
MAP 7 LOT 39	488,497 SF	11.214 AC	350.88'	8.774 AC
MAP 7 LOT 39–1	665,946 SF	15.288 AC	368.04'	11.050 AC

4. MAP 7 LOTS 39 AND 39–1 ARE PRIMARILY FORESTED AND CONTAIN NO EXISTING STRUCTURES. THEY ARE PARTIALLY CLEARED AND CONTAIN AN EXISTING GRAVEL DRIVEWAY.
5. SUBJECT PARCEL IS SITUATED IN THE R2 AND R3 DISTRICT. THE FOLLOWING DIMENSIONAL STANDARDS APPLY:

REQUIREMENT	R2	R3
MIN BUILDABLE AREA	2 ACRES	3 ACRES
MIN LOT FRONTAGE	200 FT	250 FT
FRONT SETBACK	40 FT	50 FT
SIDE SETBACK	25 FT	40 FT
REAR SETBACK	25 FT	40 FT
MIN STRUCTURE SETBACK FROM WETLANDS	50 FT	50 FT

6. BOUNDARY INFORMATION SHOWN HEREON IS BASED ON AN ACTUAL FIELD SURVEY PERFORMED BY THE OFFICE OF J.E. BALENGER LAND SURVEYING, PLLC IN MAY OF 2023.
7. THE PARCELS WILL BE SERVICED WITH ON–SITE WATER SUPPLY AND ON–SITE SEWAGE DISPOSAL SYSTEMS.
8. AN INVESTIGATION OF FEMA'S NATIONAL FLOOD INSURANCE RATE MAPPING FOR MERRIMACK COUNTY, NEW HAMPSHIRE (PANEL NO. 33013C0294E) HAVING AN EFFECTIVE DATE OF APRIL 19, 2010 SUGGESTS THOSE PORTIONS OF THE SUBJECT PARCEL SHOWN ON THIS PLAN IS NOT SITUATED IN A DESIGNATED FLOOD HAZARD AREA HAVING A BASE FLOOD ELEVATION (100–YEAR) ELEVATION OF 396.
9. TOPOGRAPHICAL SURVEY INFORMATION SHOWN HEREON IS REFERENCED TO THE NATIONAL GEODETIC VERTICAL DATUM (NVGD) OF 1929.
10. THE LOCATION OF ANY UNDERGROUND UTILITY INFORMATION SHOWN HEREON IS APPROXIMATE. KEACH–NORDSTROM ASSOCIATES, INC. MAKES NO CLAIM TO THE ACCURACY OR COMPLETENESS OF THE UTILITIES SHOWN. PRIOR TO ANY EXCAVATION ON SITE THE CONTRACTOR OR OWNER SHALL CONTACT DIG–SAFE AT 811.
11. SUBJECT TO EASEMENTS, RIGHTS AND RESTRICTIONS SHOWN OR IDENTIFIED HEREON ARE THOSE FOUND DURING RESEARCH AT THE MERRIMACK COUNTY REGISTRY OF DEEDS. OTHER EASEMENTS, RIGHTS AND RESTRICTIONS MAY EXIST WHICH A TITLE EXAMINATION OF THE SUBJECT PREMISES MAY DETERMINE.

SCALE: 1" = 1,000'

NOTES:

1. THE PURPOSE OF THIS PLAN IS TO DEPICT THE IMPROVEMENT REQUIRED FOR A 4-UNIT BUILDING ON ASSESSOR'S MAP 7 LOTS 39 AND 39-1, SHOWN HEREON.
2. REFERENCE THESE PARCELS AS LOT 39 ON WARNER TAX MAP 7.
3. MAP 7 LOT 39 IS PRIMARILY FORESTED AND CONTAINS NO EXISTING STRUCTURES. IT IS PARTIALLY CLEARED AND CONTAINS AN EXISTING GRAVEL DRIVEWAY AND RIPRAP DRAINAGE DITCHES. THE EXISTING AREA IS 1,507,247 S.F. OR 34.60 AC.
4. SUBJECT PARCELS ARE SITUATED IN THE R2 AND R3 DISTRICT, BUT CONSTRUCTION IN ITS ENTIRETY WILL TAKE PLACE IN R2. THE FOLLOWING DIMENSIONAL STANDARDS APPLY:

REQUIREMENT	R2	R3
MIN BUILDABLE AREA	2 ACRES	3 ACRES
MIN LOT FRONTAGE	200 FT	250 FT
FRONT SETBACK	40 FT	50 FT
SIDE SETBACK	25 FT	40 FT
REAR SETBACK	25 FT	40 FT
MIN STRUCTURE SETBACK FROM WETLANDS	50 FT	50 FT

5. BUILDABLE AREA REQUIRED
   4 UNITS ON MAP 7 LOT 39
   MINIMUM AREA REQUIRED: 2 ACRES + ($\frac{1}{4}$ x 2 ACRES)/EXTRA UNIT x 3 EXTRA UNITS = 5 ACRES
   MINIMUM AREA PROVIDED: 8.774 ACRES
   4 UNITS ON MAP 7 LOT 39-1
   MINIMUM AREA REQUIRED: 2 ACRES + ($\frac{1}{4}$ x 2 ACRES)/EXTRA UNIT x 3 EXTRA UNITS = 5 ACRES
   MINIMUM AREA PROVIDED: 11.050 ACRES
6. THE PROPOSED PARCELS ARE ALL OVER 5 ACRES IN SIZE AND THEREFORE DO NOT REQUIRE NHDES SUBDIVISION APPROVAL.
7. MAP 7 LOTS 39 AND 39-1 WILL HAVE A SHARED DRIVEWAY.
8. THE PROPOSED PARCELS WILL BE SERVICED WITH ON-SITE WATER SUPPLY AND SEWAGE DISPOSAL SYSTEMS.
9. AN INVESTIGATION OF FEMA'S NATIONAL FLOOD INSURANCE RATE MAPPING FOR MERRIMACK COUNTY, NEW HAMPSHIRE (PANEL NO. 33013C0294E) HAVING AN EFFECTIVE DATE OF APRIL 19, 2010 SUGGESTS THOSE PORTIONS OF THE SUBJECT PARCEL SHOWN ON THIS PLAN IS NOT SITUATED IN A DESIGNATED FLOOD HAZARD AREA HAVING A BASE FLOOD ELEVATION (100-YEAR) ELEVATION OF 396.
10. TOPOGRAPHICAL SURVEY INFORMATION SHOWN HEREON IS REFERENCED TO THE NATIONAL GEODETIC VERTICAL DATUM (NVGD) OF 1929.
11. THE LOCATION OF ANY UNDERGROUND UTILITY INFORMATION SHOWN HEREON IS APPROXIMATE. KEACH-NORDSTROM ASSOCIATES, INC. MAKES NO CLAIM TO THE ACCURACY OR COMPLETENESS OF THE UTILITIES SHOWN. PRIOR TO ANY EXCAVATION ON SITE THE CONTRACTOR OR OWNER SHALL CONTACT DIG-SAFE AT 811.
12. SUBJECT TO EASEMENTS, RIGHTS AND RESTRICTIONS SHOWN OR IDENTIFIED HEREON ARE THOSE FOUND DURING RESEARCH AT THE MERRIMACK COUNTY REGISTRY OF DEEDS. OTHER EASEMENTS, RIGHTS AND RESTRICTIONS MAY EXIST WHICH A TITLE EXAMINATION OF THE SUBJECT PREMISES MAY DETERMINE.
13. THE APPLICANT SHALL OBTAIN ANY OTHER FEDERAL, STATE, OR LOCAL APPROVALS THAT MAY BE REQUIRED.
14. REQUIRED PERMITS:
    A. DOT DRIVEWAY PERMIT
    B. DOT R.O.W. WORK PERMIT
    C. ALTERATION OF TERRAIN
15. EPA NOTICE OF INTENT- REQUIRED 14 DAYS PRIOR TO CONSTRUCTION
16. THE SUBDIVISION REGULATIONS OF THE TOWN OF WARNER ARE A PART OF THIS PLAT, AND APPROVAL OF THE PLAT REQUIRES THE COMPLETION OF ALL THE REQUIREMENTS OF SAID SUBDIVISION REGULATIONS EXCEPTING ONLY ANY RELAXATION OF REQUIREMENTS GRANTED IN WRITING BY THE PLANNING BOARD.
17. PARKING: EACH UNIT HAS 3 PARKING SPACES AND ONE GARAGE SPACE.
18. PER THE TOWN OF WARNER EARTH EXCAVATION REGULATIONS, SECTION IV.E. ALL EXCAVATION ASSOCIATED WITH THIS APPLICATION IS INCIDENTAL TO CONSTRUCTION AND CAN COMMENCE UPON RECEIPT OF LOCAL AND STATE PERMITS AND/OR APPROVALS
19. ALL ELECTRIC AND COMMUNICATIONS SERVICES SHALL BE INSTALLED UNDERGROUND FROM THE NEW POLE TO BE PROVIDED BY THE UTILITY COMPANY.
20. THE PROJECT IS LOCATED WITHIN ½ MILE OF THE WARNER RIVER.
21. THE METHOD OF FIRE PROTECTION AND/OR FIRE SUPPRESSION SHALL BE DESIGNED AND PRESENTED AT THE TIME OF BUILDING PERMIT. THE DESIGN SHALL BE APPROVED BY THE AUTHORITY HAVING JURISDICTION.

THIS MAP PRODUCT IS WITHIN THE TECHNICAL STANDARDS OF THE NATIONAL COOPERATIVE SOIL SURVEY. IT IS A SPECIAL PURPOSE PRODUCT, INTENDED FOR INFILTRATION REQUIREMENTS BY THE NH DES ALTERATION OF TERRAIN BUREAU. IT WAS PRODUCED BY A PROFESSIONAL SOIL SCIENTIST, AND IS NOT A PRODUCT OF THE USDA NATURAL RESOURCES CONSERVATION SERVICE. THERE IS A REPORT THAT ACCOMPANIES THIS MAP.

THE SITE SPECIFIC SOIL SURVEY (SSSS) WAS PRODUCED NOVEMBER 23, 2024 AND WAS PREPARED BY LUKE HURLEY, CSS # 095, HURLEY ENVIRONMENTAL AND LAND PLANNING, LLC.

SOILS WERE IDENTIFIED WITH THE NEW HAMPSHIRE STATE–WIDE NUMERICAL SOILS LEGEND, USDA NRCS, DURHAM, NH. ISSUE # 10, JANUARY 2011. THE NUMERIC LEGEND WAS AMENDED TO IDENTIFY THE CORRECT SOIL COMPONENTS OF THE COMPLEX.

HYDROLOGIC SOIL GROUP FROM KSAT VALUES FOR NEW HAMPSHIRE SOILS, SOCIETY OF SOIL SCIENTISTS OF NEW ENGLAND, SPECIAL PUBLICATION NO. 5, SEPTEMBER, 2009.

LOAM & SEED ALL DISTURBED AREAS (TYP.)

CONSTRUCTION NOTES:

1. THE PURPOSE OF THIS PLAN IS TO SHOW THE PROPOSED GRADING, DRAINAGE AND UTILITY SYSTEMS FOR THIS SITE.
2. ALL WORK SHALL CONFORM TO THE APPLICABLE REGULATIONS AND STANDARDS OF THE TOWN OF WARNER, AND SHALL BE BUILT IN A WORKMANLIKE MANNER IN ACCORDANCE WITH THE PLANS AND SPECIFICATIONS. THE STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, STATE OF NEW HAMPSHIRE, DEPARTMENT OF TRANSPORTATION, APPROVED AND ADOPTED 2016 ARE HEREBY INCORPORATED BY REFERENCE.
3. ALL STUMPS, ROOTS, BRANCHES, BRUSH, WOODS AND OTHER PERISHABLE MATERIAL RESULTING FROM THE CLEARING AND GRUBBING OPERATIONS SHALL BE DISPOSED OF BY AN APPROVED METHOD.
4. DEBRIS REMOVED FROM THE SITE SHALL BE DISPOSED OF IN ACCORDANCE WITH ALL LOCAL, STATE AND FEDERAL REGULATIONS.
5. PARKING LOT CONSTRUCTION SHALL CONFORM TO THE TYPICAL SECTIONS AND DETAILS SHOWN ON THE PLANS, AND SHALL MEET THE REQUIREMENTS.
6. ALL DISTURBED AREAS SHALL BE LOAMED AND SEEDED.
7. SEE DETAILS FOR DRAINAGE SPECIFICATIONS.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING AND DETERMINING THE LOCATION, SIZE AND ELEVATION OF ALL EXISTING UTILITIES, SHOWN OR NOT SHOWN ON THESE PLANS, PRIOR TO THE START OF ANY CONSTRUCTION THE ENGINEER SHALL BE NOTIFIED IN WRITING OF ANY UTILITIES FOUND INTERFERING WITH THE PROPOSED CONSTRUCTION, AND APPROPRIATE REMEDIAL ACTION TAKEN BEFORE PROCEEDING WITH THE WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONTACTING "DIG SAFE" AT 811 AT LEAST 72 HOURS BEFORE DIGGING.
9. NO TEST BORINGS WERE COMPLETED OR PROVIDED.

UTILITY NOTE

THE UNDERGROUND UTILITIES DEPICTED HEREON HAVE BEEN DRAWN FROM FIELD SURVEY INFORMATION AND OR PLOTTED FROM EXISTING DRAWINGS. KEACH–NORDSTROM ASSOCIATES, INC. MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES DEPICTED COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. FURTHER, KEACH–NORDSTROM ASSOCIATES, INC. DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM THE INFORMATION AVAILABLE. KEACH–NORDSTROM ASSOCIATES, INC. HAS NOT PHYSICALLY LOCATED THE UNDERGROUND PORTIONS OF THE UTILITIES.

NPDES NOTE

THIS PROJECT DISTURBS IN EXCESS OF 1–ACRE OF LAND. THEREFORE IT WILL BE REQUIRED TO OBTAIN NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT COVERAGE AS ISSUED BY THE ENVIRONMENTAL PROTECTION AGENCY (EPA). THE OWNER/DEVELOPER AND "OPERATOR" (GENERAL CONTRACTOR) SHALL EACH BE REQUIRED TO PREPARE AND SUBMIT A NOTICE OF INTENT (NOI) TO THE EPA PRIOR TO THE START OF CONSTRUCTION AND SHALL BE RESPONSIBLE FOR THE PREPARATION AND IMPLEMENTATION OF A STORM WATER POLLUTION PREVENTION PLAN (SWPPP) MEETING THE REQUIREMENTS OF THE CURRENT CONSTRUCTION GENERAL PERMIT.

REMOVAL NOTES:

1. ALL STUMPS, ROOTS, BRANCHES, BRUSH, WOODS AND OTHER PERISHABLE MATERIAL RESULTING FROM THE CLEARING AND GRUBBING OPERATIONS SHALL BE DISPOSED OF BY AN APPROVED METHOD.
2. ALL EXISTING PAVEMENT AND GRAVEL WITHIN THE CROSS HATCHED AREA IS TO BE REMOVED DURING THE DEMOLITION PHASE OF THE PROJECT. EXCESS MATERIAL FROM THESE AREAS SHALL BE APPROPRIATELY DISPOSED OF OFFSITE BY AN APPROVED METHOD.
3. THE CONTRACTOR SHALL CONTROL ALL DUST GENERATED DURING THE REMOVAL PHASE AND CONSTRUCTION PHASE SO THAT NO DUST LEAVES THE SITE.
4. ANY MONUMENTS DISTURBED DURING CONSTRUCTION SHALL BE RESET BY A NEW HAMPSHIRE LICENSED LAND SURVEYOR AT THE SITE CONTRACTORS EXPENSE.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONTACTING "DIG SAFE" AT 811 AT LEAST 72 HOURS BEFORE DIGGING.
6. DEBRIS REMOVED FROM THE SITE SHALL BE DISPOSED OF IN ACCORDANCE WITH ALL LOCAL, STATE AND FEDERAL REGULATIONS.

EROSION & SEDIMENT CONTROL LEGEND

- PERMANENT OUTLET PROTECTION APRON (RIP RAP)
- PERIMETER CONTROL
- TEMPORARY INLET CONTROLS
- STABILIZED CONSTRUCTION EXIT
- STAGING AND STOCKPILE AREA
- EROSION CONTROL BLANKETS

EROSION CONTROL NOTES:

1. THE PURPOSE OF THIS PLAN IS TO DEPICT THE REQUIRED ONSITE TEMPORARY CONSTRUCTION EROSION CONTROL MEASURES AS WELL AS THE PERMANENT EROSION CONTROL MEASURES.
2. ALL MEASURES IN THE PLAN SHALL MEET AS A MINIMUM THE BEST MANAGEMENT PRACTICES SET FORTH IN VOLUME 3 OF THE NEW HAMPSHIRE STORMWATER MANUEL TITLED "EROSION AND SEDIMENT CONTROLS DURING CONSTRUCTION," DATED DECEMBER 2010, AS AMENDED FROM TIME TO TIME.
3. WHENEVER PRACTICAL, NATURAL VEGETATION SHALL BE RETAINED, PROTECTED OR SUPPLEMENTED. THE STRIPPING OF VEGETATION SHALL BE DONE IN A MANNER THAT MINIMIZES SOIL EROSION.
4. APPROPRIATE EROSION AND SEDIMENT CONTROL MEASURES SHALL BE INSTALLED PRIOR TO LAND DISTURBANCE USING WILDLIFE FRIENDLY EROSION CONTROL MATERIALS TO PREVENT TRAPPING OF ANIMALS.
5. THE AREA OF DISTURBANCE SHALL BE KEPT TO A MINIMUM. DISTURBED AREAS REMAINING IDLE FOR MORE THAN 5 DAYS SHALL BE STABILIZED.
6. MEASURES SHALL BE TAKEN TO CONTROL EROSION WITHIN THE PROJECT AREA. SEDIMENT IN RUNOFF WATER SHALL BE TRAPPED AND RETAINED WITHIN THE PROJECT AREA USING APPROVED MEASURES. WETLAND AREAS AND SURFACE WATERS SHALL BE PROTECTED FROM SEDIMENT.
7. OFFSITE SURFACE WATER AND RUNOFF FROM UNDISTURBED AREAS SHALL BE DIVERTED AWAY FROM DISTURBED AREAS WHERE FEASIBLE OR CARRIED NON-EROSIVELY THROUGH THE PROJECT AREA. INTEGRITY OF DOWNSTREAM DRAINAGE SYSTEMS SHALL BE MAINTAINED.
8. ALL TEMPORARY EROSION AND SEDIMENT CONTROL MEASURES SHALL BE MAINTAINED IN FUNCTIONING CONDITION UNTIL FINAL SITE STABILIZATION IS ACCOMPLISHED.
9. ALL TEMPORARY EROSION AND SEDIMENT CONTROL MEASURES SHALL BE REMOVED AFTER FINAL SITE STABILIZATION. TRAPPED SEDIMENT AND OTHER DISTURBED SOIL AREAS RESULTING FROM THE REMOVAL OF TEMPORARY MEASURES SHALL BE PERMANENTLY STABILIZED WITHIN 5 DAYS UNLESS CONDITIONS DICTATE OTHERWISE.
10. THE TOWN OF WARNER SHALL RESERVE THE RIGHT TO REQUIRE FURTHER EROSION CONTROL PRACTICES DURING CONSTRUCTION SHOULD THEY FIND IT NECESSARY.
11. SNOW ACCUMULATED DURING THE WINTER CONSTRUCTION CONDITIONS SHOULD BE STORED IN THE STAGING & STOCKPILE AREA DETERMINED BY THE CONTRACTOR, SURROUNDED BY SILT FENCE.
12. THE CONTRACTOR SHALL NOT DISCHARGE RUNOFF FROM UNSTABILIZED AREAS OF THE SITE TO INFILTRATION BMPS.
13. PERIODIC INSPECTION AND MAINTENANCE OF THE CULVERTS AND CATCH BASINS SHALL OCCUR. SEE OPERATIONS AND MAINTENANCE PLAN FOR DETAILS.

UTILITY NOTE

THE UNDERGROUND UTILITIES DEPICTED HEREON HAVE BEEN DRAWN FROM FIELD SURVEY INFORMATION AND OR PLOTTED FROM EXISTING DRAWINGS. KEACH–NORDSTROM ASSOCIATES, INC. MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES DEPICTED COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. FURTHER, KEACH–NORDSTROM ASSOCIATES, INC. DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM THE INFORMATION AVAILABLE. KEACH–NORDSTROM ASSOCIATES, INC. HAS NOT PHYSICALLY LOCATED THE UNDERGROUND PORTIONS OF THE UTILITIES.

NPDES NOTE

THIS PROJECT DISTURBS IN EXCESS OF 1–ACRE OF LAND. THEREFORE IT WILL BE REQUIRED TO OBTAIN NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT COVERAGE AS ISSUED BY THE ENVIRONMENTAL PROTECTION AGENCY (EPA). THE OWNER/DEVELOPER AND "OPERATOR" (GENERAL CONTRACTOR) SHALL EACH BE REQUIRED TO PREPARE AND SUBMIT A NOTICE OF INTENT (NOI) TO THE EPA PRIOR TO THE START OF CONSTRUCTION AND SHALL BE RESPONSIBLE FOR THE PREPARATION AND IMPLEMENTATION OF A STORM WATER POLLUTION PREVENTION PLAN (SWPPP) MEETING THE REQUIREMENTS OF THE CURRENT CONSTRUCTION GENERAL PERMIT.

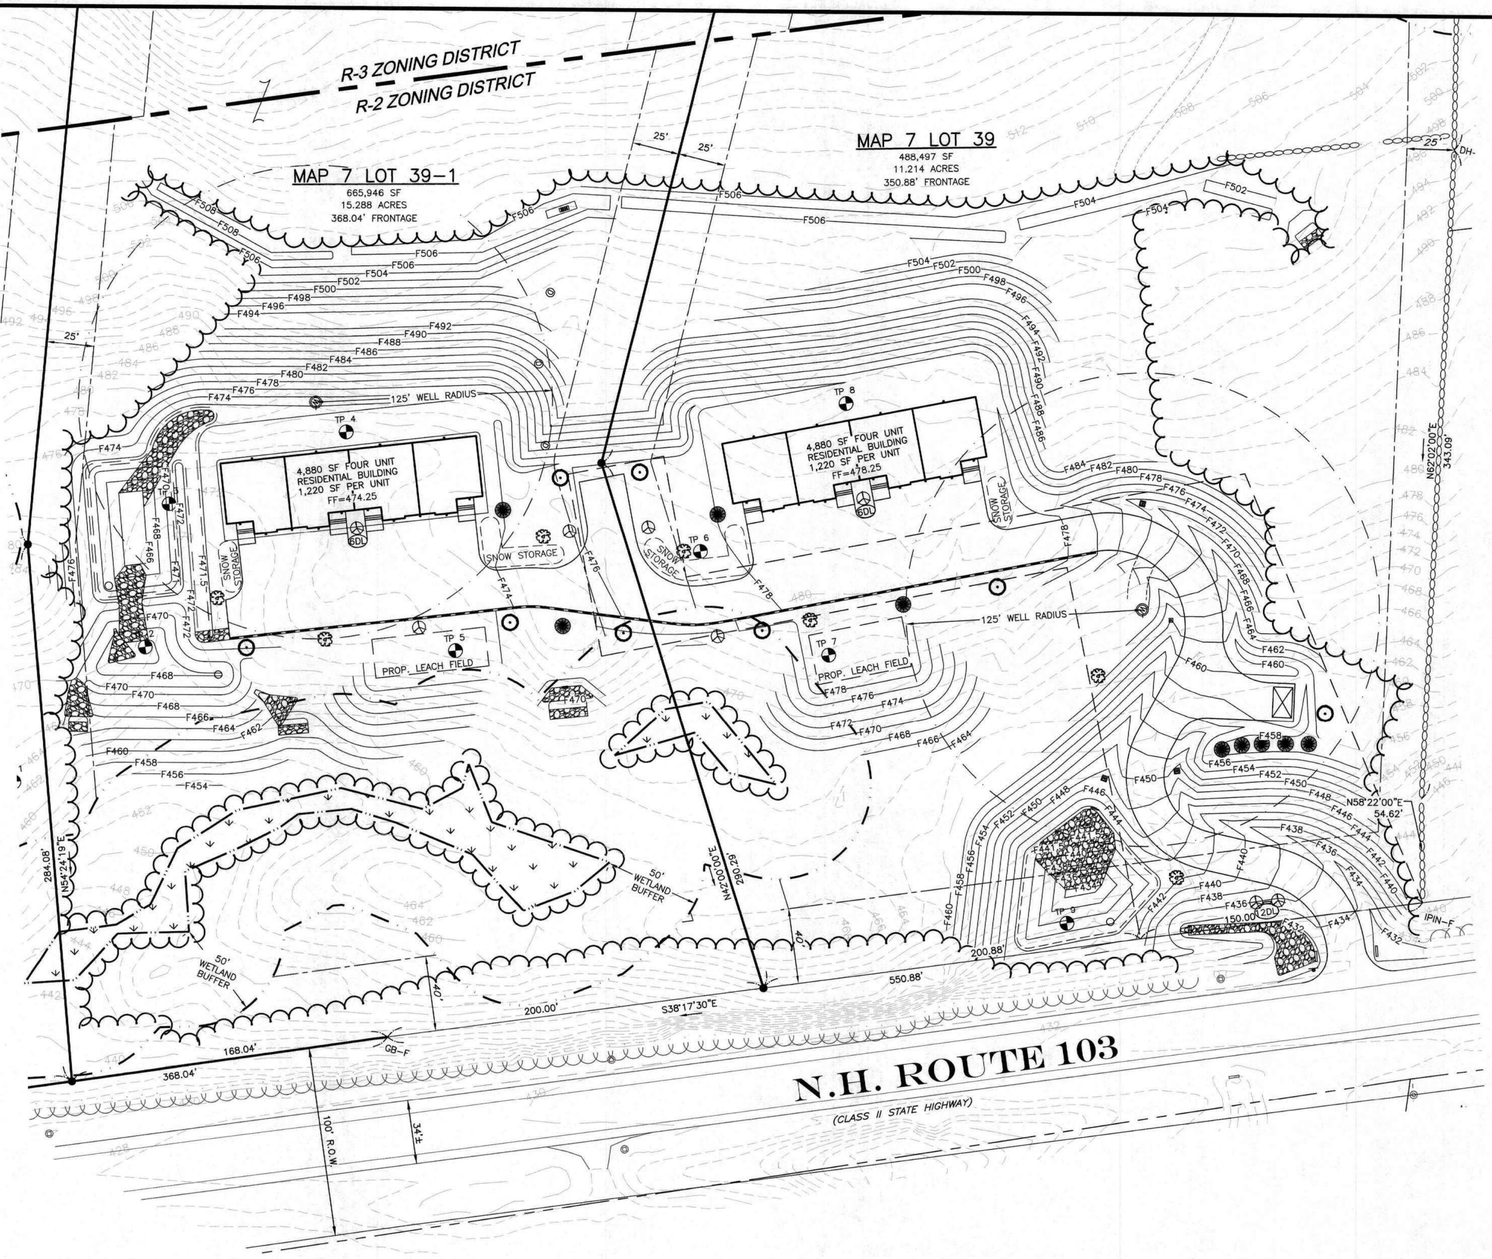
DATE: MARCH 25, 2025	**SCALE:** 1" = 40'
PROJECT NO: 24–0307–1	**SHEET** 6 **OF** 16



LANDSCAPE NOTES:

1. THE PURPOSE OF THIS PLAN IS TO SHOW THE PROPOSED SITE LANDSCAPE WHICH PROVIDES CLIMATIC RELIEF AND AESTHETIC APPEAL.
2. STRIPPED TOPSOIL SHALL BE STOCKPILED AND REUSED ON THE SITE WHERE NEEDED. TOPSOIL SHALL BE A MINIMUM OF 4 INCHES DEEP (MEASURED WHEN CONSOLIDATED). TOPSOIL SHALL BE TREATED IF NEEDED TO PROMOTE HEALTHY GRASS WHEN SEEDED. SCARIFY AND REPEAT SEEDING AS NECESSARY.
3. SITE PREPARATION IS TO BE CONDUCTED WITH MINIMAL DISTURBANCE TO EXISTING VEGETATION WHICH WILL REMAIN.
4. CONSTRUCTION MATERIALS, EQUIPMENT, VEHICLES OR TEMPORARY SOIL DEPOSITS SHALL NOT BE LOCATED WITHIN THE DRIP-LINE OF TREES THAT ARE TO BE PRESERVED.
5. EXISTING TREES WHICH REMAIN SHALL BE PRUNED AND THINNED IF APPROPRIATE PER UNH COOPERATIVE EXTENSION RECOMMENDATIONS TO MAINTAIN HEALTHY APPEARANCES.
6. ALL OPEN SPACE AREAS NOT COVERED WITH PLANTINGS SHALL BE COVERED WITH GRASS OR OTHER VEGETATIVE GROUNDCOVERS, WITH THE EXCEPTION OF PLANTING BEDS WHICH MAY BE MULCHED.
7. WHERE SLOPES OF 33% OR GREATER ARE CREATED OR DISTURBED, THEY SHALL BE COVERED OR PLANTED WITH DEEP ROOTED SPECIES TO PREVENT EROSION.
8. ALL DEAD, DYING, OR DISEASED VEGETATION SHALL BE PROMPTLY REPLACED, BASED ON SEASONAL PLANTING PRACTICES, WITH HEALTHY LIVING PLANTS IN ALL REQUIRED LANDSCAPE AREAS.
9. PROVIDE A MAINTENANCE ESCROW ACCOUNT TO ENSURE THAT ANY PLANTED MATERIALS WILL BE REPLACED IN THE EVENT THEY ARE DAMAGED OR DIE WITHIN ONE YEAR AFTER FINAL COMPLETION OF THE PROJECT.
10. NO PLANTINGS SHALL CONFLICT WITH SNOW STORAGE AREAS, LIGHT FIXTURES AND UNDERGROUND UTILITIES.
11. NO LANDSCAPING CONFLICTS WITH SIGHT DISTANCE.

LANDSCAPE CALCULATION:

ONE TREE PER 60 FEET OF ACCESS WAY: 800 LF / 60 FT = 13.3 TREES

ONE TREE PER 20 PARKING SPACES: 24 SPACES / 20 SPACES = 1.2 TREES

14.5 = 15 TREES

LIGHTING NOTES:

EXTERIOR LIGHTING

1. EXTERIOR LIGHTING SHALL BE DESIGNED TO COORDINATE WITH THE BUILDING ARCHITECTURE AND LANDSCAPING, AND SHOULD CONTRIBUTE TO THE CHARACTER OF THE PROPERTY, NEIGHBORHOOD, AND STREET.
2. THE STYLE OF LIGHTING FIXTURES USED SHALL BE UNIFORM FOR THE ENTIRE SITE.
3. OUTDOOR LIGHTING IS RESTRICTED TO THAT WHICH IS NECESSARY FOR SAFETY AND SECURITY OF THE DEVELOPMENT.
4. WHERE PRACTICAL, EXTERIOR LIGHTING INSTALLATIONS SHALL INCLUDE TIMERS, DIMMERS, MOTION SENSORS, OR PHOTOCELL CONTROLLERS THAT TURN THE LIGHTS OFF DURING DAYLIGHT HOURS OR HOURS WHEN LIGHTING IS NOT NEEDED ELIMINATE UNNEEDED LIGHTING.
5. EXTERIOR LIGHTING INSTALLATIONS SHALL BE DESIGNED TO AVOID HARSH CONTRASTS IN LIGHTING LEVELS.

CONTROL OF GLARE

6. THE PURPOSE OF THIS PLAN IS TO SHOW THE PROPOSED SITE LIGHTING.
7. LIGHTING SHALL BE POSITIONED TO PREVENT UNDESIRABLE INCIDENTAL ILLUMINATION OF ABUTTING PROPERTIES, THE STREET, AND THE NIGHTTIME SKY.
8. SECURITY, [PARKING LOT, AND SIGN LIGHTING SHALL BE SHIELDED OR OTHERWISE DESIGN THE ENSURE THE LIGHT IS DIRECTED DOWNWARD.
9. TO PREVENT LIGHT POLLUTION AND IMPACTS ON ABUTTING PROPERTIES, THE TOTAL CUTOFF OF LIGHT SHOULD OCCUR WITHIN THE PROPERTY LINES OF THE LOT TO BE DEVELOPED.

UTILITY NOTE

THE UNDERGROUND UTILITIES DEPICTED HEREON HAVE BEEN DRAWN FROM FIELD SURVEY INFORMATION AND OR PLOTTED FROM EXISTING DRAWINGS. KEACH–NORDSTROM ASSOCIATES, INC. MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES DEPICTED COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. FURTHER, KEACH–NORDSTROM ASSOCIATES, INC. DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM THE INFORMATION AVAILABLE. KEACH–NORDSTROM ASSOCIATES, INC. HAS NOT PHYSICALLY LOCATED THE UNDERGROUND PORTIONS OF THE UTILITIES.

NPDES NOTE

THIS PROJECT DISTURBS IN EXCESS OF 1–ACRE OF LAND. THEREFORE IT WILL BE REQUIRED TO OBTAIN NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT COVERAGE AS ISSUED BY THE ENVIRONMENTAL PROTECTION AGENCY (EPA). THE OWNER/DEVELOPER AND "OPERATOR" (GENERAL CONTRACTOR) SHALL EACH BE REQUIRED TO PREPARE AND SUBMIT A NOTICE OF INTENT (NOI) TO THE EPA PRIOR TO THE START OF CONSTRUCTION AND SHALL BE RESPONSIBLE FOR THE PREPARATION AND IMPLEMENTATION OF A STORM WATER POLLUTION PREVENTION PLAN (SWPPP) MEETING THE REQUIREMENTS OF THE CURRENT CONSTRUCTION GENERAL PERMIT.

NOT TO SCALE

POND NUMBER	ELEV. A	ELEV. B	ELEV. C
21P	470.00	466.00	471.75

MAINTENANCE REQUIREMENTS:

SEDIMENT FOREBAYS:
- INSPECT AT LEAST ANNUALLY;
- CONDUCT PERIODIC MOWING OF EMBANKMENTS (GENERALLY TWO TIMES PER YEAR) TO CONTROL GROWTH OF WOODY VEGETATION ON EMBANKMENTS;
- REMOVE DEBRIS FROM OUTLET STRUCTURES AT LEAST ONCE ANNUALLY;
- REMOVE AND DISPOSE OF ACCUMULATED SEDIMENT BASED ON INSPECTION;
- INSTALL AND MAINTAIN A STAFF GAGE OR OTHER MEASURING DEVICE, TO INDICATE DEPTH OF SEDIMENT ACCUMULATION AND LEVEL AT WHICH CLEAN-OUT IS REQUIRED.

INFILTRATION:
- REMOVAL OF DEBRIS FROM INLET AND OUTLET STRUCTURES;
- REMOVAL OF ACCUMULATED SEDIMENT;
- INSPECTION AND REPAIR OF OUTLET STRUCTURES AND APPURTENANCES;
- INSPECTION OF INFILTRATION COMPONENTS AT LEAST TWICE ANNUALLY, AND FOLLOWING ANY RAINFALL EVENT EXCEEDING 2.5 INCHES IN A 24 HOUR PERIOD, WITH MAINTENANCE OR REHABILITATION CONDUCTED AS WARRANTED BY SUCH INSPECTION;
- INSPECTION OF PRETREATMENT MEASURES AT LEAST TWICE ANNUALLY, AND REMOVAL OF ACCUMULATED SEDIMENT AS WARRANTED BY INSPECTION, BUT NO LESS THAN ONCE ANNUALLY;
- PERIODIC MOWING OF EMBANKMENTS;
- REMOVAL OF WOODY VEGETATION FROM EMBANKMENTS;
- INSPECTION AND REPAIR OF EMBANKMENTS AND SPILLWAYS;
- IF AN INFILTRATION SYSTEM DOES NOT DRAIN WITHIN 72-HOURS FOLLOWING A RAINFALL EVENT, THEN A QUALIFIED PROFESSIONAL SHOULD ASSESS THE CONDITION OF THE FACILITY TO DETERMINE MEASURES REQUIRED TO RESTORE INFILTRATION FUNCTION, INCLUDING BUT NOT LIMITED TO REMOVAL OF ACCUMULATED SEDIMENTS OR RECONSTRUCTION OF THE INFILTRATION TRENCH.

CONSTRUCTION PRACTICE REQUIREMENTS:

1. STORMWATER PONDS, INFILTRATION BASINS, AND SWALES MUST BE INSTALLED BEFORE ROUGH GRADING TO SITE.
2. RUNOFF MUST BE DIRECTED TO TEMPORARY PRACTICES UNTIL STORMWATER BMPs ARE STABILIZED.
3. STORMWATER PONDS, INFILTRATION BASINS, AND SWALES MUST BE STABILIZED PRIOR TO DIRECTING RUNOFF TO THEM.
4. DO NOT TRAFFIC EXPOSED SOIL SURFACE WITH CONSTRUCTION EQUIPMENT. IF FEASIBLE, PERFORM EXCAVATION WITH EQUIPMENT POSITIONED OUTSIDE THE LIMITS OF THE INFILTRATION SYSTEM.
5. AFTER THE INFILTRATION SYSTEM AREA IS EXCAVATED TO THE FINAL DESIGN ELEVATION, THE FLOOR SHOULD BE DEEPLY TILLED WITH A ROTARY TILLER OR DISC HARROW TO RESTORE INFILTRATION RATES, FOLLOWED BY A PASS WITH A LEVELING DRAG.
6. DO NOT PLACE INFILTRATION SYSTEMS INTO SERVICE UNTIL THE CONTRIBUTING AREAS HAVE BEEN FULLY STABILIZED.
7. INFILTRATION BASIN FLOOR PREPARATION WILL INCLUDE GRASS TURF THAT CAN BE INUNDATED FOR UP TO 72 HOURS.
8. INFILTRATION AREAS ARE TO BE PROTECTED FROM OVER-COMPACTION DURING CONSTRUCTION.

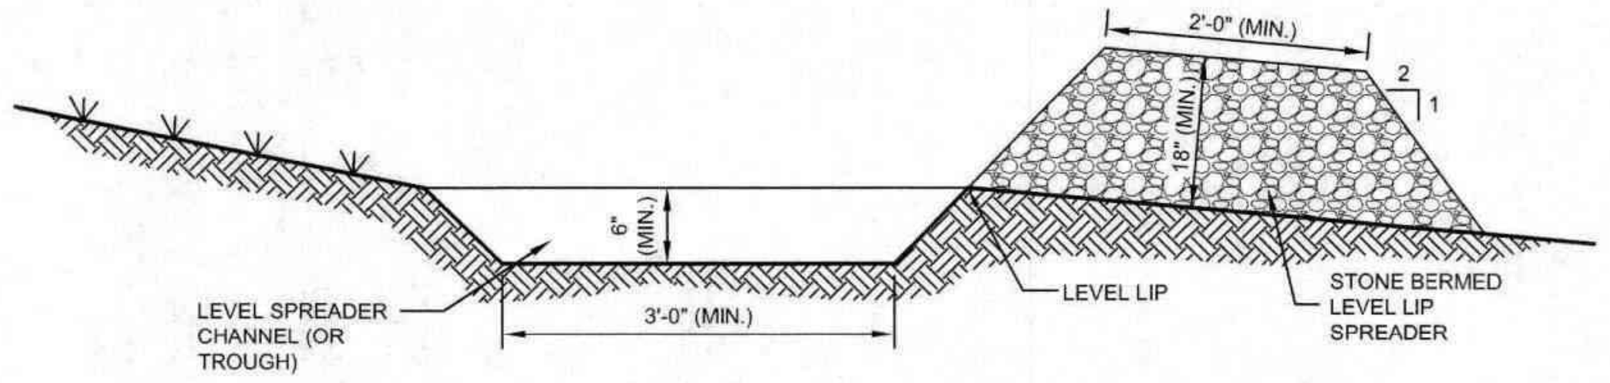
DATE: MARCH 25, 2025 | **SCALE:** AS SHOWN
PROJECT NO: 24-0307-1 | **SHEET** 13 **OF** 16

GRADATION OF STONE FOR LEVEL SPREADER BERM	
SIEVE DESIGNATION	PERCENT BY WEIGHT PASSING SQUARE MESH SIEVES
12 INCH	100%
6 INCH	84 - 100%
3 INCH	68 - 83%
1 INCH	42 - 55%
NO. 4	8 - 12%



NOTES:

1. CONSTRUCT THE LEVEL SPREADER LIP ON A ZERO PERCENT GRADE TO INSURE UNIFORM SPREADING OF RUN-OFF.
2. LEVEL SPREADER SHALL BE CONSTRUCTED ON UNDISTURBED SOIL AND NOT ON FILL.
3. THE FLOW FROM THE LEVEL SPREADER SHALL OUTLET INTO STABILIZED AREAS. WATER SHOULD NOT RECONCENTRATE IMMEDIATELY BELOW THE SPREADER.
4. PERIODIC INSPECTION AND REQUIRED MAINTENANCE SHALL BE PERFORMED.

MAINTENANCE REQUIREMENTS:

1. INSPECT AT LEAST ONCE ANNUALLY FOR ACCUMULATION OF SEDIMENT AND DEBRIS AND FOR SIGNS OF EROSION WITHIN APPROACH CHANNEL, SPREADER CHANNEL OR DOWN-SLOPE OF THE SPREADER.
2. REMOVE DEBRIS WHENEVER OBSERVED DURING INSPECTION.
3. REMOVE SEDIMENT WHEN ACCUMULATION EXCEEDS 25% OF SPREADER CHANNEL DEPTH.
4. MOW AS REQUIRED BY LANDSCAPE DESIGN. AT A MINIMUM, MOW ANNUALLY TO CONTROL WOODY VEGETATION WITHIN THE SPREADER.
5. SNOW SHOULD NOT BE STORED WITHIN OR DOWN-SLOPE OF THE LEVEL SPREADER OR ITS APPROACH CHANNEL.
6. REPAIR ANY EROSION AND RE-GRADE OR REPLACE STONE BERM MATERIAL, AS WARRANTED BY INSPECTION.
7. RECONSTRUCT THE SPREADER IF DOWN-SLOPE CHANNELIZATION INDICATES THAT THE SPREADER IS NOT LEVEL OR THAT DISCHARGE HAS BECOME CONCENTRATED, AND CORRECTIONS CANNOT BE MADE THROUGH MINOR RE-GRADING.

TABLE 7-24 -- RECOMMENDED RIP RAP GRADATION RANGES	
PERCENT OF WEIGHT SMALLER THAN THE GIVEN SIZE	SIZE OF STONE
100%	1.5 TO 2.0 d50
85%	1.3 TO 1.8 d50
50%	1.0 TO 1.5 d50
15%	0.3 TO 0.5 d50

CONSTRUCTION SPECIFICATIONS:

1. THE SUBGRADE FOR THE FILTER MATERIAL, GEOTEXTILE FABRIC AND RIP RAP SHALL BE PREPARED TO THE LINES AND GRADES SHOWN ON THE PLANS.
2. THE ROCK OR GRAVEL USED FOR FILTER OR RIP RAP SHALL CONFORM TO THE SPECIFIED GRADATION.
3. GEOTEXTILE FABRICS SHALL BE PROTECTED FROM PUNCTURE OR TEARING DURING THE PLACEMENT OF THE ROCK RIP RAP. DAMAGED AREAS IN THE FABRIC SHALL BE REPAIRED BY PLACING A PIECE OF FABRIC OVER THE DAMAGED AREA OR BY COMPLETE REPLACEMENT OF THE FABRIC. ALL OVERLAPS REQUIRED FOR REPAIRS OR JOINING TWO PIECES OF FABRIC SHALL BE A MINIMUM OF 12 INCHES.
4. STONE FOR THE RIP RAP MAY BE PLACED BY EQUIPMENT AND SHALL BE CONSTRUCTED TO THE FULL LAYER THICKNESS IN ONE OPERATION AND IN SUCH A MANNER AS TO PREVENT SEGREGATION OF THE STONE SIZES.

MAINTENANCE:

THE OUTLET PROTECTION SHOULD BE CHECKED AT LEAST ANNUALLY AND AFTER EVERY MAJOR RAIN EVENT. IF THE RIP RAP HAS BEEN DISPLACED, UNDERMINED, OR DAMAGED, IT SHOULD BE REPAIRED IMMEDIATELY. THE CHANNEL IMMEDIATELY BELOW THE OUTLET SHOULD BE CHECKED TO SEE THAT EROSION IS NOT OCCURRING. THE DOWNSTREAM CHANNEL SHOULD BE KEPT CLEAR OF OBSTRUCTIONS SUCH AS FALLEN TREES, DEBRIS, AND SEDIMENT THAT COULD CHANGE FLOW PATTERNS AND/OR TAILWATER DEPTHS ON THE PIPES. REPAIRS MUST BE CARRIED OUT IMMEDIATELY TO AVOID ADDITIONAL DAMAGE TO THE OUTLET PROTECTION APRON.

FILTER BASKET NOTES:

1. INLET BASKETS SHALL BE USED ON ALL CATCH BASINS WITHIN THE PROJECT LIMITS WITH PAVED AREAS. INLET FILTER BASKETS SHALL BE "SILT SAK©" OR APPROVED EQUAL.
2. FILTER FABRIC SHALL BE PUSHED DOWN AND FORMED TO THE SHAPE OF THE BASKET. THE SHEET OF FABRIC SHALL BE LARGE ENOUGH TO BE SUPPORTED BY THE BASKET FRAME WHEN HOLDING SEDIMENT AND EXTEND AT LEAST 6 INCHES PAST THE FRAME. THE INLET GRATE SHALL BE PLACED OVER THE BASKET/FRAME AND WILL SERVE AS THE FABRIC ANCHOR.
3. THE FILTER FABRIC SHALL BE A GEOTEXTILE FABRIC: POLYESTER, POLYPROPYLENE, STABILIZED NYLON, POLYETHYLENE OR POLYVINYLIDENE CHLORIDE MEETING THE FOLLOWING SPECIFICATIONS:
   GRAB STRENGTH: 300 LB. MINIMUM IN ANY PRINCIPAL DIRECTION (ASTM D-4632).
   MULLEN BURST STRENGTH: MINIMUM 600 PSI (ASTM D-3786).
4. THE FABRIC SHALL HAVE AN OPENING NO GREATER THAN A NUMBER 40 U.S. STANDARD SIEVE AND MINIMUM PERMEABILITY OF 40 GPM/SQ.FT.
5. THE INLET BASKET SHALL BE INSPECTED WITHIN 24 HOURS AFTER EACH RAINFALL OR DAILY DURING EXTENDED PERIODS OF PRECIPITATION. REPAIRS SHALL BE MADE IMMEDIATELY, AS NECESSARY, TO PREVENT PARTICLES FROM ENTERING THE DRAINAGE PIPING SYSTEM AND/OR CAUSING SURFACE FLOODING.
6. INLET BASKET SHALL BE MAINTAINED IN PLACE UNTIL ALL PAVING IS COMPLETED AND ALL UNPAVED AREAS HAVE BEEN STABILIZED WITH VEGETATION.

SECTION

SILT FENCE DETAIL
NOT TO SCALE
(MARCH 2008)

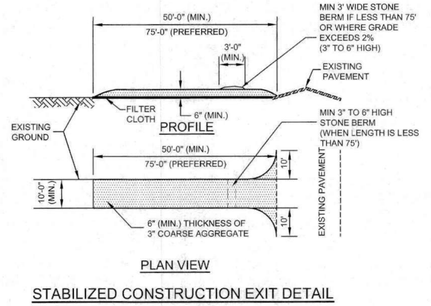
CONSTRUCTION SPECIFICATIONS:
1. THE GEOTEXTILE FABRIC SHALL MEET THE DESIGN CRITERIA FOR SILT FENCES.
2. THE FABRIC SHALL BE EMBEDDED A MINIMUM OF 8 INCHES INTO THE GROUND AND THE SOIL COMPACTED OVER THE EMBEDDED FABRIC.
3. WOVEN WIRE FENCE SHALL BE FASTENED SECURELY TO THE FENCE POSTS WITH WIRE TIE OR STAPLES WHERE NOTED OR AS DIRECTED BY DESIGN ENGINEER.
4. FILTER CLOTH SHALL BE FASTENED SECURELY TO THE WOVEN WIRE FENCE WITH TIES SPACED EVERY 24 INCHES AT THE TOP, MIDSECTION AND BOTTOM.
5. WHEN TWO SECTIONS OF FILTER CLOTH ADJOIN EACH OTHER, THEY SHALL BE OVERLAPPED BY 6 INCHES, FOLDED AND STAPLED.
6. FENCE POSTS SHALL BE A MINIMUM OF 36 INCHES LONG AND DRIVEN A MINIMUM OF 16 INCHES INTO THE GROUND. WOOD POSTS SHALL BE OF SOUND QUALITY HARDWOOD AND SHALL HAVE A MINIMUM CROSS SECTIONAL AREA OF 3.0 SQUARE INCHES.
7. MAINTENANCE SHALL BE PERFORMED AS NEEDED AND MATERIAL REMOVED WHEN "BULGES" DEVELOP IN THE SILT FENCE.

MAINTENANCE:
1. SILT FENCES SHALL BE INSPECTED IMMEDIATELY AFTER EACH RAINFALL AND AT LEAST DAILY DURING PROLONGED RAINFALL. ANY REPAIRS THAT ARE REQUIRED SHALL BE MADE IMMEDIATELY.
2. IF THE FABRIC ON A SILT FENCE SHOULD DECOMPOSE OR BECOME INEFFECTIVE DURING THE EXPECTED LIFE OF THE FENCE, THE FABRIC SHALL BE REPLACED PROMPTLY.
3. SEDIMENT DEPOSITS SHOULD BE INSPECTED AFTER EVERY STORM EVENT. THE DEPOSITS SHOULD BE REMOVED WHEN THEY REACH APPROXIMATELY ONE-HALF THE HEIGHT OF THE BARRIER.
4. SEDIMENT DEPOSITS THAT ARE REMOVED OR LEFT IN PLACE AFTER THE FABRIC HAS BEEN REMOVED SHALL BE GRADED TO CONFORM WITH THE EXISTING TOPOGRAPHY AND VEGETATED.

MAINTENANCE:
MUD AND SOIL PARTICLES WILL EVENTUALLY CLOG THE VOIDS IN THE CRUSHED STONE AND THE EFFECTIVENESS OF THE CRUSHED STONE PAD WILL NOT BE SATISFACTORY. WHEN THIS OCCURS, THE PAD SHOULD BE TOPDRESSED WITH NEW CRUSHED STONE OR COMPLETE REPLACEMENT OF THE PAD MAY BE NECESSARY WHEN THE PAD BECOMES COMPLETELY CLOGGED.

IF WASHING FACILITIES ARE USED, THE SEDIMENT TRAPS SHOULD BE CLEANED OUT AS OFTEN AS NECESSARY TO ASSURE THAT ADEQUATE TRAPPING EFFICIENCY AND STORAGE VOLUME IS AVAILABLE. VEGETATIVE FILTER STRIPS SHOULD BE MAINTAINED TO INSURE A VIGOROUS STAND OF VEGETATION AT ALL TIMES.

CONSTRUCTION SPECIFICATIONS:
1. STONE FOR A STABILIZED CONSTRUCTION EXIT SHALL BE 3 INCH STONE, RECLAIMED STONE OR RECYCLED CONCRETE EQUIVALENT.
2. THE MINIMUM LENGTH OF THE PAD SHALL BE 75 FEET, EXCEPT THAT THE MINIMUM LENGTH MAY BE REDUCED TO 50 FEET IS A 3-INCH TO 6-INCH HIGH BERM IS INSTALLED AT THE ENTRANCE OF THE PROJECT SITE.
3. THE THICKNESS OF THE STONE FOR THE STABILIZED EXIT SHALL NOT BE LESS THAN 6 INCHES.
4. THE WIDTH OF THE EXIT SHALL NOT BE LESS THAN THE FULL WIDTH OF THE AREA WHERE INGRESS OR EGRESS OCCURS OR 10 FEET, WHICHEVER IS GREATER.
5. GEOTEXTILE FILTER CLOTH SHALL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING THE STONE. FILTER CLOTH IS NOT REQUIRED FOR A SINGLE FAMILY RESIDENCE LOT.
6. ALL SURFACE WATER THAT IS FLOWING TO OR DIVERTED TOWARD THE CONSTRUCTION EXIT SHALL BE PIPED BENEATH THE EXIT. IF PIPING IS IMPRACTICAL, A BERM WITH 5:1 SLOPES THAT CAN BE CROSSED BY VEHICLES MAY BE SUBSTITUTED FOR THE PIPE.
7. THE EXIT SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOPDRESSING WITH ADDITIONAL STONE AS CONDITIONS DEMAND AND REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, WASHED OR TRACKED ONTO PUBLIC RIGHT-OF-WAY MUST BE REMOVED PROMPTLY.
8. WHEELS SHALL BE CLEANED TO REMOVE MUD PRIOR TO ENTRANCE ONTO PUBLIC RIGHTS-OF-WAY . WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH STONE WHICH DRAINS INTO AN APPROVED SEDIMENT TRAPPING DEVICE.



PLAN VIEW

SECTION VIEW

NOTES:
1. ALL MATERIAL TO MEET FILTREXX® SPECIFICATIONS.
2. SILTSOXX™ COMPOST/SOIL/ROCK/SEED FILL TO MEET APPLICATION REQUIREMENTS.
3. SILTSOXX™ DEPICTED IS FOR MINIMUM SLOPES. GREAT SLOPES MAY REQUIRE LARGER SOCKS PER THE ENGINEER.
4. COMPOST MATERIAL TO BE DISPERSED ON SITE, AS DETERMINED BY ENGINEER.

FILTREXX® SILTSOXX™ DETAIL
NOT TO SCALE

CONSTRUCTION SEQUENCE
1. FIRST CUT AND CLEAR TREES AND BRUSH ONLY WITHIN DESIGNATED LIMITS OF CLEARING AS NECESSARY TO FACILITATE PROPOSED CONSTRUCTION. ALL TREES, BRANCHES AND OTHER VEGETATIVE MATERIALS SHALL BE PROPERLY DISPOSED OF OFF SITE BY THE CONTRACTOR. THIS PROJECT IS MANAGED TO MEET THE REQUIREMENTS AND INTENT OF RSA 430:53 AND AGR 3800 RELATIVE TO INVASIVE SPECIES.
2. PRIOR TO COMMENCEMENT OF ANY EARTHMOVING OPERATIONS, ALL APPLICABLE TEMPORARY EROSION CONTROL MEASURES, INCLUDING SPECIFIED PERIMETER SILTATION FENCING AND STABILIZED CONSTRUCTION EXIT SHALL BE IN PLACE AS SHOWN ON THE PROJECT PLANS.
3. COMPLETE GRUBBING OPERATIONS. ALL STUMPS AND SIMILAR ORGANIC DEBRIS SHALL BE PROPERLY DISPOSED OF BY THE CONTRACTOR. NATIVE ORGANIC SOIL MATERIALS SUITABLE FOR USE AS TOPSOIL SHALL BE STOCKPILED WITHIN AREAS OUT OF THE WAY OF OTHER CONSTRUCTIONS ACTIVITIES AND DRAINAGE FLOW. STOCKPILES SHALL BE TEMPORARILY SEEDED WITH WINTER RYE AND BE SURROUNDED WITH HAY BALES AND/OR FABRIC SILTATION FENCE IN ORDER TO PREVENT LOSS DUE TO EROSION.
4. BEGIN EARTHMOVING OPERATIONS, COMMENCING WITH WORK NEEDED TO BALANCE SITE AND FACILITATE BUILDING FOUNDATION AND RETAINING WALL CONSTRUCTION. PERMANENT DOWNSLOPE WORK SHALL BE PROTECTED FROM UPGRADIENT STORMWATER FLOW BY THE CONSTRUCTION OF TEMPORARY EARTHEN DIKES OR EXCAVATED SWALES.
5. ONCE BUILDING FOUNDATION WORK IS UNDERWAY, CONTINUE EARTHMOVING OPERATIONS UNTIL DESIGN SUBGRADE IS ACHIEVED.
6. INSTALL DRAINAGE SWALE SYSTEMS AND OTHER UTILITIES WORKING FROM LOW TO HIGH. INCOMPLETE WORK SHALL BE PROTECTED FROM SILTATION BY THE USE OF SILTATION BARRIERS AROUND SWALES UNTIL THE SITE HAS BECOME FULLY STABILIZED.
7. PLACE GRAVEL AND CRUSHED GRAVEL OVER PROPOSED DRIVEWAY, WALKS AND PARKING AREAS AND COMPACT IN SPECIFIED LIFT THICKNESS.
8. COMPLETE EXCAVATION/STABILIZATION GRADING ACTIVITIES. WHEN COMPLETE, IMMEDIATELY BEGIN TOPSOILING PROPOSED TURF AREAS USING STOCKPILED LOAM SUPPLEMENTED WITH BORROW LOAM, IF NECESSARY, TO LEAVE A THICKNESS OF 4 INCHES OF FRIABLE LOAM.
9. FINE GRADE ALL FUTURE TURF AREAS AND HYDROSEED WITH THE SPECIFIED SEED MIXTURE IMMEDIATELY AFTER FINE GRADING IS COMPLETED. ALL AREAS SHALL BE STABILIZED WITHIN 72 HOURS OF ACHIEVING FINISH GRADE.
10. INSTALL THE BINDER COURSE OF PAVEMENT OVER ALL DESIGNATED AREAS.
11. CONTINUE TO MONITOR AND RECTIFY MINOR SITE AND SLOPE EROSION UNTIL ENTIRE SITE APPEARS TO BE COMPLETELY STABILIZED AND VEGETATED WITH A HEALTHY STAND OF TURF OR GROUND COVER. MAINTAIN SPECIFIED SILTATION/EROSION CONTROL MEASURES THROUGH ONE WINTER.
12. INSTALL THE SPECIFIED WEARING COURSE OF PAVEMENT OVER THE BINDER COURSE.
13. COMPLETE INSTALLATION OF LANDSCAPING, SIGNAGE AND OTHER SITE AMENITIES.

EROSION CONTROL NOTES
1. EXPOSED EARTHWORK SHALL BE CONFINED TO AS LIMITED AN AREA AS IS PRACTICAL AT ANY GIVEN TIME THROUGHOUT THE CONSTRUCTION SEQUENCE. AT NO TIME SHALL MORE THAN FIVE (5) ACRES OF SITE AREA BE IN AN UNSTABLE CONDITION. NO GIVEN AREA OF THE SITE SHALL BE LEFT IN AN UNSTABILIZED CONDITION FOR A PERIOD OF TIME EXCEEDING THIRTY (30) CALENDAR DAYS.
2. TEMPORARY EROSION CONTROL MEASURES SHALL BE INSTALLED IN STRICT ACCORDANCE WITH PROJECT PLANS. IN ADDITION, SIMILAR MEASURES SHALL BE INSTALLED WHERE AND WHEN THE FIELD CONDITION, OR FIELD OPERATION OF THE INDIVIDUAL SITE CONTRACTOR, MAY WARRANT. ALL TEMPORARY EROSION CONTROL MEASURES USED SHALL BE INSPECTED WEEKLY AND WITHIN 24 HOURS AFTER 0.25" OF RAINFALL OR MORE. THEY SHALL BE CLEANED AND MAINTAINED AND OTHERWISE KEPT IN AN EFFECTIVE OPERATING MANNER THROUGHOUT THE CONSTRUCTION PERIOD.
3. ALL DISTURBED AREAS DESIGNATED TO BE TURF, SHALL RECEIVE A MINIMUM APPLICATION OF 4 INCHES OF LOAM (COMPACTED THICKNESS), PRIOR TO FINAL SEEDING AND MULCHING.
4. ALL SWALES AND DITCHLINES SHALL BE PERIODICALLY CLEANED OF DEPOSITED SEDIMENT SO AS TO MAINTAIN AN EFFECTIVE GRADE AND CROSS SECTION. ALL SWALES AND DITCHLINES SHALL BE FULLY STABILIZED PRIOR TO HAVING STORMWATER DIRECTED TOWARDS THEM.
5. IN THE EVENT THAT, DURING CONSTRUCTION OF ANY PORTION OF THIS PROJECT, A WINTER SHUTDOWN IS NECESSARY, THE CONTRACTOR SHALL STABILIZE ALL INCOMPLETE WORK AND PROVIDE FOR SUITABLE METHODS OF DIVERTING RUNOFF IN ORDER TO ELIMINATE SHEET FLOW ACROSS FROZEN SURFACES.
6. AN AREA SHALL BE CONSIDERED STABLE IF ONE OF THE FOLLOWING HAS OCCURRED:
   A. BASE COURSE GRAVELS ARE INSTALLED IN AREAS TO BE PAVED;
   B. A MINIMUM OF 85% VEGETATED GROWTH HAS BEEN ESTABLISHED;
   C. A MINIMUM OF 3" OF NON-EROSIVE MATERIAL SUCH AS STONE OR RIP RAP HAS BEEN INSTALLED; OR
   D. EROSION CONTROL BLANKETS HAVE BEEN PROPERLY INSTALLED.
7. DUST SHALL BE CONTROLLED BY THE USE OF WATER AS NECESSARY THROUGHOUT THE CONSTRUCTION PERIOD, IN ACCORDANCE WITH ENV-A 1000.
8. IN NO WAY ARE THOSE TEMPORARY EROSION CONTROL MEASURES INDICATED ON THESE PLANS TO BE CONSIDERED ALL INCLUSIVE. THE CONTRACTOR SHALL USE JUDGEMENT IN INSTALLING SUPPLEMENTARY EROSION CONTROL MEASURES WHERE AND WHEN SPECIFIC SITE CONDITIONS AND/OR CONSTRUCTION METHODOLOGIES MAY WARRANT.
9. AREAS HAVING FINISH GRADE SLOPES OF 3 : 1 OR STEEPER, SHALL BE STABILIZED WITH JUTE MATTING WHEN AND IF FIELD CONDITIONS WARRANT, OR IF SO ORDERED. JUTE MATTING INSTALLED TO CONFORM WITH THE RECOMMENDED BEST MANAGEMENT PRACTICE OUTLINED IN VOLUME 3 OF THE NEW HAMPSHIRE STORMWATER MANUAL "EROSION AND SEDIMENT CONTROLS DURING CONSTRUCTION."
10. ALL DETENTION PONDS AND TREATMENT SWALES SHALL BE CONSTRUCTED PRIOR TO ANY EARTH MOVING ACTIVITIES THAT WILL INFLUENCE STORMWATER RUNOFF.
11. ALL ROADWAYS AND PARKING AREAS SHALL BE STABILIZED WITHIN 72 HOURS OF ACHIEVING FINISHED GRADE.
12. ALL CUT AND FILL SLOPES SHALL BE STABILIZED WITHIN 72 HOURS OF ACHIEVING FINISHED GRADE.

WINTER CONSTRUCTION NOTES:
1. ALL PROPOSED POST-DEVELOPMENT VEGETATED AREAS WHICH DO NOT EXHIBIT A MINIMUM OF 85% VEGETATIVE GROWTH BY OCTOBER 15TH, OR WHICH ARE DISTURBED AFTER OCTOBER 15TH, SHALL BE STABILIZED BY SEEDING AND INSTALLING EROSION CONTROL BLANKETS ON SLOPES GREATER THAN 4:1, AND SEEDING AND PLACING 3 TO 4 TONS OF MULCH PER ACRE, SECURED WITH ANCHORED NETTING, ELSEWHERE. THE PLACEMENT OF EROSION CONTROL BLANKETS OR MULCH AND NETTING SHALL NOT OCCUR OVER ACCUMULATED SNOW OR ON FROZEN GROUND AND SHALL BE COMPLETED IN ADVANCE OF THAW OR SPRING MELT EVENTS.
2. ALL DITCHES OR SWALES WHICH DO NOT EXHIBIT A MINIMUM OF 85% VEGETATIVE GROWTH BY OCTOBER 15TH, OR WHICH ARE DISTURBED AFTER OCTOBER 15TH, SHALL BE STABILIZED WITH STONE OR EROSION CONTROL BLANKETS APPROPRIATE FOR THE DESIGN FLOW CONDITIONS.
3. AFTER OCTOBER 15TH, INCOMPLETE ROAD OR PARKING SURFACES SHALL BE PROTECTED WITH A MINIMUM OF 3 INCHES OF CRUSHED GRAVEL PER NHDOT ITEM 304.3 OR, IF CONSTRUCTION IS TO CONTINUE THROUGH THE WINTER SEASON, BE CLEARED OF ANY ACCUMULATED SNOW AFTER EACH STORM EVENT.
4. AN AREA SHALL BE CONSIDERED STABLE IF ONE OF THE FOLLOWING HAS OCCURRED:
   A. BASE COURSE GRAVELS ARE INSTALLED IN AREAS TO BE PAVED;
   B. A MINIMUM OF 85% VEGETATED GROWTH HAS BEEN ESTABLISHED;
   C. A MINIMUM OF 3" OF NON-EROSIVE MATERIAL SUCH AS STONE OR RIP RAP HAS BEEN INSTALLED; OR
   D. EROSION CONTROL BLANKETS HAVE BEEN PROPERLY INSTALLED.
