Dear Elizabeth,

Please allow this email to serve as a price proposal for 7000 gallons of heating oil and 7200 gallons of propane for the '25-'26 heating season. The contract will be valid from the date signed to June 30, 2026. Any unused gallons will NOT carryover at the same price per gallon. Any overage will be calculated at the daily posted price on the day of delivery.

\$2.854 per gallon for Heating Oil

\$1.999 per gallon for Propane

For your propane contract – this will require a 3 year supply agreement. A site assessment will be required prior to the initial tank swap and any deficiencies that do not comply with the current Fire Safety Code that the State of NH has adopted at this time, by law, will need to be brought into compliance at additional costs.

There is also a compliance charge of \$6.95 per delivery which helps to defray costs for safety training, licensing, safety, inspections and hazardous material training – see attached.

These prices are based on the current absence of tariffs. If tariffs are imposed, the quoted price will increase proportionally and be reflected in the price per gallon on each delivery invoice. We will notify you in advance if tariffs are added and provide the relevant details.

Due to volatility that we see in the markets, this proposal has a short window for return/commitment – **this will expire on Wednesday September 24, 2025 at Noon.**

Subject: Re: PRICE PROPOSAL FOR OIL AND PROPANE FOR '25-'26 HEATING SEASON

Good Morning Donna!

The Selectboard tabled their discussion about oil until tomorrow night's meeting. Would you mind giving me an updated quote please? They said they will make the decision tomorrow night for sure.

Thank you!!

Elizabeth Labbe, she/her
